
PROJECT TOPIC: Justice Connect : A web based lawyer- client Interaction platform and case management System

Programme: MCA

Project Group Members:

1. Priyanka (12584200147)
2. Tanu Chaudhary (12584200193)
3. Aditri Agrawal (12584200011)
4. Mandvi Yadav (12584200114)

Project Supervisor: Ms. Deepti Gautam , Assistant Professor

Objective: The main objective of Justice Connect is to develop a user-friendly platform that connects lawyers and clients digitally. It aims to simplify legal consultation and case management through an efficient system.

The platform provides secure role-based access for lawyers and clients and improves communication through online interaction. It also ensures proper case record management, reduces paperwork, and enhances accessibility to legal services.

Tools required:

➤ **Hardware Requirements:**

- Processor: Intel i3 or higher
- RAM: Minimum 4 GB (8 GB recommended)
- Storage: 500 MB free space (for project & dependencies)
- Internet Connection: Required

➤ **Software Requirements:**

- Operating System: Windows 10 / 11 / Linux / macOS
- Backend: Python 3 (& libraries)
- Database: SQLite
- Code Editor: VS Code
- Browser: Google Chrome / Edge

➤ **Technology Used:**

- Development Tools: VS Code
- Web Technologies : HTML(Structure) , CSS (Styling) , JavaScript

Abstract: Justice Connect is a web-based platform designed to connect lawyers and clients efficiently. It provides a centralized system for managing legal interactions and case-related activities. The platform allows users to register as either a lawyer or a client with secure authentication.

Clients can search for lawyers, request consultations, and track case progress online. Lawyers can manage multiple cases, update case status, and maintain digital records. The system reduces dependency on manual paperwork and improves data organization.

It ensures transparency by maintaining proper communication and case history.

The platform enhances accessibility to legal services, especially in remote areas.

It is developed using web technologies with a back-end powered by Python and Flask.

Overall, Justice Connect improves efficiency, communication, and accessibility in legal services.

Outcome:
